Ram

The Ram collection embodies elegance in its raw form, where metal becomes a decorative element and functionality takes on an artistic dimension. The chairs in this series not only fulfill their practical role but also captivate the eye with their bold, distinctive design. The metal structure has been prominently featured in the design of this line — minimalist yet robust. The characteristic lines of the supporting frame highlight the industrial character of the collection. The perforated metal plate, visible at the back of the backrest, serves as an embellishment, giving the chairs a unique, rugged character.

In the Ram design, the balance between structure and space, as well as the hardness of metal and user comfort, has been thoughtfully considered. Thanks to its durable metal construction, the chairs are sturdy and stable while remaining lightweight and easy to move. The upholstered seat, available as an overlay element, adds essential comfort and underscores attention to user satisfaction.

Ram chairs are available in three base variants: four-legged, on wheels, and with a cross-base featuring wheels. This variety allows for flexible adaptation of the furniture to the character of the space — ranging from static conference rooms to dynamic, ever-changing work environments where mobility is key.

Designed for office spaces that promote meetings, relationships, and effective work, the Ram furniture brings a new quality to office interactions — from formal presentations to casual conversations in coworking spaces.

Key features

- **Striking industrial design** – the distinctive metal frame with exposed lines of the support ring and perforated backrest give the chairs a raw yet elegant look, making them stand out in modern office and conference spaces.
- **Variety of options and customization** – the collection offers three base options: four legs, castors, and a cross-base with casters. Additionally, the upholstered seat as a removable element provides enhanced comfort and allows for customization of both the look and functionality of the chair.
- **Ergonomics and comfort** – the contoured backrest and perforation ensure proper support and air circulation, enhancing comfort during extended use. The upholstered seat adds an extra layer of comfort, seamlessly blending aesthetics with functionality.

Specifications
